VII Municipalities.

57. The total number is given in the margin. No new municipalities have been established during the year

Nature of Municipality	No.
City Municipality	"
Town D°	5

At Oolvi in Supa Taluka a temporary municipality is opened every year during the fair held here in honor of a Lingait Saint, this year it continued from 26th February to 5th March The general state of municipal Institutions in this District is very uncertain at present as the whole system of taxation has been raised and future receipts are doubtful. There are

are other places where Municipalities could be usefully established, but until the present problem in taxation has been fairly worked out, and the proper system of taxation settled in existing Municipalities I donot advocate the establishment of new ones.

58 The following summary shews the actual income and expenditure of each Municipality. In the four principal towns the charge for establishment is high but it is necessary and has been reduced as low as possible The subject is under consideration. When the Collection of Octroi dues was farmed it was unnecessary to maintain a large body of servants but with Departmental Collection

of Bhatkal and Ankola, and. can be cheaply maintained.

Collection 15 is a difference of Rupees 5.

According to the situation of the town, the expense of collecting such duties, is more or less. At Malijal there are several outlets, and the cost is therfore higher than elsewhere. At Gokarn the expenditure is low, as for some months in the year the receipts are very unimportant, and no establishment is kept up. The general receipts of the Municipalities are low and insufficient for their wants, but by degrees fresh modes of taxation may be adopted by the Municipal Commissioners who much prefer the old transit duties to any other form of taxation. Under Safety and health there is a large expenditure shewn. This includes

includes Conservancy, Medical.
Charges &c. The staff of sweepers
kept up by Municipalities is a
very expensive charge. These people
are generally foreigners in this
District, and demand a high
rate of pay. There is no alternative
but to pay them what they ask
as no new men can be induced
to come. At Coompta the sum
of Rs 2800 was paid for the Dis:
pensary which is a most use-
ful institution in charge of
Assistant Surgeon Mackenzie
This Municipality also pays
Rs 1200 towards the English school
Other Municipalities contribute
similarly, according to their
means. At Sirsi lately Rs 10,000
have been collected by voluntary
subscription

subscription for the purpose of
having an Assistant Surgeon
in charge of the Dispensary. The
papers are now before Government.
The Municipalities have employed
the prisoners of the Subordinate
Jails on petty works. The most
important work undertaken by
a Municipality has been the
road to the Seabeach at Coupta
it crosses a creek by a bridge
and embankment. The work
was very difficult one, but the
energy and skill of Mr Mackenz
overcame all difficulties. The
Municipalities have Managing
Committees and the Chairmen
are the Mamlutdars. But at
Coompta Assistant Surgeon
Mackenzie is Chairman, and

includes Conservancy, Medical.

Yaliyal to be very well conduct
ed and the other two to be fairly
good

good institutions. There is a question as to the value of these low grade English Schools. I see from a correspondence copies of which the Educational Inspector has favoured me with, that the Commissioner, C.D. considers that they are good as feeders for High Schools, and that as boys must pass the 4th Vernacular Standard before beginning English, their Vernacular Education is not neglected. I am afraid that good as this argument is theoretically, yet in practice the very reverse is too often true. Early in 1874 when Mr Havelock the Revenue Commissioner visited this District, he inspected the Anglo-Vernacular

School

School at Kaluyal, at that time
English was taught in a separate
building. Curiosity regarding the
number of recruits from the Verna-
cular School led me to suggest
that they should be examined in
the Vernacular. The result only
shewed the tendency to press on
the English class to the great detri-
ment of the Vernacular classes. I
have therefore steadily opposed
any further increase to the pre-
sent number of Anglo-Vernacular
Schools in Kanara. Not includ-
ing the High School, the first
grade Anglo-Vernacular School
at Coompta and the four second
grade Anglo-Vernacular Schools,
at Benkikodla, Honawar, Sirsi
and Kaluyal I visited 42 schools
purely

good institutions. There is a question as to the value of these low grade English Schools. I see from a correspondence, copies of which the Educational Inspector has favoured me with, that the Commissioner, C.D. considers that they are good as feeders for High Schools, and that as boys must pass the 4th Vernacular Standard before beginning English, their Vernacular Education is not neglected I am afraid that good as this argument is theoretically, yet in practice the very reverse, is too often true. Early in 1874 when Mr. Hancock the Revenue Commissioner visited this District, he inspected the Anglo Vernacular

School

School at Kalyal, at that time English was taught in a separate building Curiosity regarding the number of recruits from the Vernacular School led me to suggest that they should be examined in the Vernacular The result only shewed the tendency to press on the English class to the great detriment of the Vernacular classes. I have therefore steadily opposed any further increase to the present number of Anglo-Vernacular Schools in Kanara. Not including the High School, the first grade Anglo-Vernacular School at Coompta and the four second grade Anglo-Vernacular Schools at Benkikodla, Honawar, Sirsi and Kalyal I visited 42 Schools,

School

School at Kalugal, at that time English was taught in a separate building. Curiosity regarding the number of recruits from the Vernacular School led me to suggest that they should be examined in the Vernacular The result only shewed the tendency to press on the English class to the great detriment of the Vernacular classes. I have therefore steadily opposed any further increase to the present number of Anglo-Vernacular Schools in Kanara. Not including the High School, the first grade Anglo-Vernacular School at Coompta and the four second grade Anglo-Vernacular schools, at Benkekodla, Honawar, Sirsi and Kalugal I visited 42 schools, purely

purely Vernacular. I was generally satisfied with their state, although their attendance is not satisfactory. There is an increase of 12 in the number of schools and of 581 in the number of scholars; this number includes the Anglo Vernacular schools In the inferior schools, that is in all except those at Karwar and Coompta there are 4708 boys and 198 girls; there are four Girls' schools, viz: at Karwar, Coompta, Sirsi and Kalijal, and these seem to get on fairly. Of the boys about 40 per cent are Brahmins, about 13 per cent Mahomedans, about 4½ per cent Christians, about 7 per cent Cultivators, and about 4½ per cent the sons

of

of labourers. There are 10 Manomeam schools in the District, and 3 Kindergarten classes in other schools, and endeavours are made to encourage education amongst these people. 97 Minors attend the schools, and nearly all the boys are vaccinated. Three new School buildings were constructed during the year, at a cost of Rs 1703-11-3; a balance of Rs 155 due was disbursed in April. Although education shews some progress this year, yet much remains to be done in securing the attendance of the boys. The new system may improve matters in this respect, but the Manukudars are now instructed to exert themselves, and see that the Village Officers and School Committees

do-

do-

do their duty fully.

There is one point which I think is deserving of the consideration of Government, and that is how the public offices at Bombay are manned. It would be of great advantage to the public service and would hold out great inducements to young men in the mofussil if the head offices in Bombay such as the Secretariat, the offices of the Accountant General, Commissioner of Customs, Collectors of Bombay and Salt Revenue, the High Court, and others were recruited from the Districts generally. At present if a young man wants employment in Bombay, he has no chance of obtaining it. Either

public

public examinations should be held, or appointments to vacancies might be filled up by Candidates recommended by the Collectors of the different districts. Some such system would give a great impulse to high education, and obtain the best available talent for the public service. I strongly recommend the trial of this or some better scheme.

61. Post. The arrangements of the District post are very fair and work well. The main line of postal communication is from Dharwar viâ Yellapur and the Arbyle Ghât to Karwar. This is a foot post, and an attempt made a few years ago to keep up a Tonga Dâk was discontinued

owing

do their duty faithfully.

owing

owing to expense. In other Districts there are lines of Railway and Tonga Dâks by which the delivery of the post is much accelerated. But North Kanara being at the extreme end of the Presidency, has been somewhat neglected, and the Postal Authorities are unwilling to incur extra expenditure here. It would be of infinite advantage to the public generally if a Tonga Dâk was established between Dharwar and Karwar The mails would be expeditiously carried and facilities for travellers would be given in a District where with the exception of Munchils or Doolies there are no means of Conveyance.

62. **Special duties.**

By Government Resolution No. 1237, dated 8th March 1880 I was directed to hold myself in readiness to serve as President of a Mixed Commission under the Anglo-Portuguese Treaty, if elected to that office by the other members of that Commission. By a telegram dated the 8th March 1880, I was informed by Mr. Oliver, a member of the Commission, that I was elected by lot to be President of the Commission. In Government Resolution No. 1316, dated 12th March 1880 this appointment was approved, and I was directed to proceed to Goa at once. I arrived at Goa on the morning of the 15th March, and at once opened

I arrived at Goa on the morning of the 15th March, and at once opened

opened the Commission It is un-
necessary for me to enter upon the
work of the Commission at any
length in this place. It is suffi
cient to state that the proprietors
of Certain Saltworks in the pro-
vinces of Salsette, Ilhas, Bardez
and Pernem, declined to sign an
agreement to manufacture salt
under the supervision of the
British Agents on certain terms,
and claimed compensation for
losses incurred by their former
system of manufacture being
prohibited by the Portuguese
Government. With few exceptions
the Commission sat daily in
the Townhall of Panjim The
proprietors who presented them-
selves were examined, independent

evidence

evidence was taken, and the records supplied by the Portuguese Government and the Bombay Salt Department were carefully sifted. The Commission also examined the weights and measures in use at the Salt Depôt in Panjim, and visited some salt works in the neighbourhood. After full discussion the Commission arrived at an unanimous decision on all the points to be determined, and I drew up a report which gave all the results of our prolonged investigation, and was signed by myself and the members of the Commission. The record was throughout bilingual, it in English and Portuguese. I

forwarded

forwarded.

forwarded the Portuguese portion with one copy of the report and all the original documents to the Chief Secretary to His Excellency the Governor-General of Portuguese India I also forwarded the English portion with a copy of the report to the Secretary to the Government of Bombay through the British Delegate. I closed the Commission on the afternoon of the 20th May and left that night for Karwar where I arrived on the evening of the 21st This special duty therefore occupied me for two months and eight days during the best part of the four seasons for travelling in the District. I was consequently unable to do

much

much of the inspection work which I otherwise could have done. — During my absence my forest Assistant Mr. J. H. Todd carried on the most emergent duties of my office, but the rest I conducted as usual at Goa.

63. Before closing this report I wish to add a few remarks on the general state of the District, as I believe that this will probably be the last Administration report on Kanara which I shall submit to Government. I have now been in charge of the Collectorate of Kanara for nearly nine years, during that time I have only been twice absent on privilege leave, each time for three months, my forest

absence

absence was prolonged to four months as I was on special duty first at Poona when Government approved of certain concessions in the collection of enhanced assessment after the introduction of the Survey Settlement, and afterwards at Bombay during the hearing of the Kanara Land Case. During my stay in the District, I have visited every part of it, and made myself as far as possible acquainted with the Country and the people. During this time the Revenue Survey Settlement has made considerable progress; on the Coast the Karwar Taluka has been completed, the large Taluka of Coompta including its

its large sub division the Ankola Peta has been nearly completed, only 10 villages now remaining for settlement; nearly whole of the Yellapur Talukta has been completed, and much progress has been made in the measurement, classification and settlement of the Sirsi, Supa and Honawar Talukas. More than half the District is now settled, and about 3/5 ths of it have been measured. Between 1863 and 1871 the Mamlutdar's charge of the Supa Talukta, the Peta of Ankola and in the Yellapur Talukta, and portions of the Sirsi and Karwar Talukas were settled. The rest of the work has been done between 1871 and 1880. —

its large Sub-division the Ankola Peta has been nearly completed, only 10 villages now remaining for settlement; nearly whole of the Yellapur Taluka has been completed, and much progress has been made in the measurement, classification and settlement of the Sirsi, Supa and Honawar Talukas. More than half the District is now settled, and about 3/5ths of it have been measured. Between 1863 and 1871 the Mamlutdar's Charge of the Supa Taluka, the Peta of Khundagod in the Yellapur Taluka, and portions of the Sirsi, and Karwar Talukas were settled. The rest of the work has been done between 1871 and 1880.

Undoubtedly

Undoubtedly this is not rapid progress, but the climate is the chief cause of delay, for work can only be carried on in the Coast villages for from 5 to 6 months, and in all villages away from the Coast and in those above Ghâts, the maximum time for which it is safe to employ an establishment of measurers is three months. Even then there is a great deal of sickness, and unfinished work of one season has to be taken up in the following one, always a cause of further delay. A minor but still important circumstance which retarded the operations of the Revenue Survey, was the opposition of the Chief proprietors.

These

These men were living at their ease, holding much land without paying any assessment, encroaching on Government land where they saw a good opportunity, and where they did pay, the rates were generally low. Naturally they objected to a Survey by which their holdings would be defined, and they would have to pay for all the land they occupied. This opposition culminated in an extraordinary number of suits being filed in the District Court, to contest the right of Government to revise the assessment, and even to survey the land. The leaders in this course maintained that there was a permanent settlement already existing

Yours

These men were living at their ease, holding much land without paying any assessment, encroaching on Government land wherever they saw a good opportunity, and where they did pay, the rates were generally low. Naturally they objected to a Survey by which their holdings would be defined, and they would have to pay for all the land they occupied. This opposition culminated in an extraordinary number of suits being filed in the District Court, to contest the right of Government to revise the Assessment, and even to survey the land. The leaders in this course maintained that there was a permanent settlement already existing

existing in North Kanara At first I found it somewhat difficult to stem this current of opposition, but by perseverance, and by insisting on all subordinates zealously assisting the Survey Officers and by severely punishing those who wilfully failed to do so, the resistance was overcome. One thing which threatened itself very convincing to the proprietors was that the charges incurred by the Survey Department in erecting boundary marks had to be paid by the occupants of the land Wherever the measurement was going on, I had the folly of not erecting their own marks, —

Carefully

carefully explained to the people shewing them that the Contractors employed as a necessary alternative invariably charged excessive rates. The result was that wherever it was possible the people at last erected their own marks. The final collapse of the opposition came of course with the decision of the High Court in the Kanara Land Case, and it was further aided by the decision in Appeal of the Forest Case. The suits in the District Court disappeared at once, and now the Survey Department has no more difficulty in Kanara in this respect than in any other District. In 1874 Government determined

The suits in the District Court disappeared at once, and now the Survey Department has no more difficulty in Kanara in this respect than in any other District. In 1874 Government determined

determined to ease the introduction of the enhanced assessment by allowing the increased demand to be paid in three years, i.e. 50 per cent in the first, 75 in the second, and the full amount in the third year. Also some concessions were granted for waste occupied land, and I was allowed to give leases for Guzni or salt-marshy land on such favourable terms as I might consider desirable. I think that these concessions were appreciated. In consequence of these changes in the revenue system of the country, other changes in the subordinate administration became necessary. The village

Officers'

Officers' charges and emoluments have been partly revised, and this will go on as the settlement progresses. The total land revenue of North Kanara when it was transferred from the Madras Presidency to that of Bombay, deducting all remissions, amounted to Rs 657,876. Now the land revenue of the settled portion of the District is Rs 522,581, and for unsettled portions Rs 348,008 — the total being Rs 870,589. Thus there is an increase of Rs 212,713, and if the settlement is concluded after 5 or 6 years I think there may be a further increase of about Rs 15,000. The main establishments at the Huzur and in the Talukas have

determined to ease the introduction of the enhanced assessment by allowing the increased demand to be paid in three years, i.e. 50 per cent in the first, 75 in the second, and the full amount in the third year. — Also some concessions were granted for waste occupied land, and I was allowed to give leases for Guzzu or salt-marshy land on such favourable terms as I might consider desirable. Officers' charges and emoluments have been partly revised, and this will go on as the settlement progresses. The total land revenue of North Kanara when it was transferred from the Madras Presidency to that of Bombay, deducting all remissions, amounted to Rs 657,876. Now the land revenue of the settled portion of the District is Rs 522,581, and for unsettled portion Rs 348,008-, — the total being Rs 870,589. Thus there is an increase of Rs 212,713, and if the settlement is concluded after 5 or 6 years I think there may be a further increase of about Rs 150,000 The main establishments at the Kuzur and in the Talukas, have

have not been increased, but some petty charges for temporary hands have been allowed by Government to meet the increased work which the presence of large establishments necessarily entailed. Originally there were 974 Village Officers, 856 Patels and 118 Shanbogs or Village Accountants. Now there are 923 Patels and 282 Shanbogs, making a total of 1205 Village officers. This increase is most essential, as under the old system with large villages their boundaries undefined, except as to the collection of the Revenue there was little real revenue manage ment. Now however where the Settlement has been introduced

the

the duties of the Village officers are much increased, and they can only be properly performed within a limited area. Pending the revision of charges in some parts I have employed under the sanction of Government temporary hands for assisting during the operations of the Survey Department. The next change that is necessary is a division of the Talukas. The large addition to the revenue and the great increase in the duties of a Mamlutdar, give more work than one man can do in Coompta and elsewhere, it will be necessary to make three or four new Talukas with efficient establishments, but each case can

The large addition to the revenue and the great increase in the duties of a Mamlutdar, give more work than one man can do in Coompta and elsewhere, it will be necessary to make three or four new Talukas with efficient establishments, but each case can

separately considered, and. each increased Expenditure as may be thought necessary can be proposed and sanctioned.

Forests. As is well known the Forests almost cover Kanara from one end to the other, except in the immediate vicinity of the Coast, where there is much rice cultivation, the villages are very thickly inhabited, and there is very little timber. The administration of the Forests of Kanara is of nearly as great importance as that of its Land Revenue Under the untiring and skilful management of Colonel Peyton the Conservancy of these Forests has been well maintained. He has now got a very

efficient

efficient staff of officers under him, and what is required is a greatly strengthened subordinate establishment. The Forest revenue have been lately much developed, and can still further be so, but without men to carry out the orders given, the work cannot be done. It will be the most economical plan in the end to sanction a strong and efficient number of Forest guards, who will guard the Forests from depredations, aid in collecting the valuable forest minor produce, and supply information on points which cannot at present be procured.

Local Funds. The available funds are expended on the

Communications, water supply, Dispensaries &c. The revenue increases as the settlement progresses. I cannot too strongly support the improvement of the Communications with the Goa Frontier, and the improvement of the main line running from Belgaum to Karwar viâ the Ainshi Ghât both from Provincial funds. The main lines of road North and South are the road to the South Kanara Frontier below Ghâts, and the road from Yellapur to the Mysore Frontier and the Gersappa Falls above Ghâts. These require bridges and other improvements; they are now maintained from Local Funds, and these cannot

afford

afford to do the necessary work yet. As the settlement is introduced, and a large increase to the assessment is made, it is absolutely necessary to open up either Cartroads or bridle paths to enable the people to carry their produce to a market. Otherwise they can hardly afford to pay the demand which they view with less dissatisfaction if it is accompanied by an improvement in the Communications with the nearest market towns. In some cases this almost doubles the value of the produce of their fields and gardens.

64. I have now touched on all the points to which I consider

64. I have now touched on all the points to which I consider

it necessary to allude here, but. before closing I must submit my views regarding the long deferred project of the Karwar Railway. Before the Bombay Government took charge, of North Kanara, there were two places where the principal Officers of Government resided One was Honawar on the Coast where the Judicial Establishments, the District Jail, and other persons lived, and a detachment of a Native Regiment was kept The other place was Sirsi above Ghats, the Head quarters of the Collector and his Subordinates. The Bombay Government at once commenced the improvement

of

of Karwar, which was the only place on the coast where vessels could lie sheltered from the South West monsoon. Eventually all the District Establishments were brought to Karwar, new buildings were constructed, and the port was improved, and an excellent lighthouse erected on some rocks just outside the harbour. A Survey was made for a line of railway to Hubli, and two good metalled roads were constructed from the Cotton districts to the port of Karwar and the open roadstead of Coomta. Seeing all this going on, merchants, traders and people of all classes flocked to

Seeing all this going on, merchants, traders and people of all classes flocked to —

Karwar

Karwar, invested in land at fabulous rates, erected large warehouses, and otherwise invested all the capital they possessed in the rising Sea-port-town which they at once called "New Bombay. But unfortunately all this came to nothing, and as in so many other instances, the original speculators in Karwar were utterly ruined. And the cause of this is that the prospects of the construction of a railway from Karwar to Hubli became so distant — that the trade which had left other ports returned to them, the public works which had employed so many people

ceased.

ceased, and the place sank
into a state of dulness not
much better than that from
which it originally emerged.
This collapse has been hastened
by the important Concession
in the Anglo-Portuguese Treaty
by which the project of a
new line of railway from Hub
to Murmagoa is fostered. If
this scheme is carried out,
undoubtedly the present trad
of all the ports of Kanara
will dwindle down to almost
nothing. As to the merits of
the two ports, after seeing both,
and endeavouring to write
dispassionately, I am certain
that the advantages of Karwa
with its sheltered harbour, an

As to the merits of the two ports, after seeing both, and endeavouring to write dispassionately, I am certain that the advantages of Karwar with its sheltered harbour, and

most useful Cove, capable of
being made into a capital
wetdock, far outweigh those
of Murmagoa. And I have
heard Captain Dundas Taylor
the Superintendent of Marine
Surveys express the same
opinion. I hope Government
will consider what a loss to
its own subjects the preference
of Goa port to Karwar will
entail. I can not think that
this has been yet ever thoroughly
considered. At Coomptá
and Karwar the value of pro-
perty in the towns and near
the ports is exceedingly high,
and it has grown year by year
But if the Kanara Railway
is given up, and the Goa —
railway

Railway constructed, the dead loss to thousands of people, will be enormous. I see no reason why the Karwar Railway, approved by the Bombay and India Governments, was not made years ago, except that blind to their own interests, the merchants of Bombay opposed it. I hope still that, even if the Goa project is entertained, the Kanara scheme may speedily be taken in hand.

65 In conclusion I hope that this report may not be concidered too lengthy. I thought that I might be permitted to conclude it with a brief sketch of the

4. The results of the Settlement

are as under

Talukas	Land Revenue Demand for Collection.	Cesses Demand for Collection.	Total Land Revenue & Cesses Demand for Collection.	Land Revenue Remitted for other reasons.	Land Revenue Remitted for Collection.	Total Remissions.
Kunjhka	26,76,12	1,69,8,1	1,85,62,2		12826. 6. 6.	12826. 6. 6.
Sirsy	3311.7.5	3103.8.2	6415.15.7		9739. 10. 6.	9739. 10. 6.
Komaon	97.12.	1193.2.4			946. 7. 10.	946. 7. 10.
Siddhapur	10,16,12.	5.3.	8804.2		8779. 13. 5.	8779. 13. 5.
Total	6164.11.	3842.14.6	10007.3		32964. 6. 3.	32964. 6. 3.

5 A comparison with the Settle-

ment

-ment of last year reported in my
No. 255 of the 6th June 1879 gives a net
increase of Rs 2983. 2. 0. as per mar
-gin. The causes of this are given
in detail in Appendix II and in
may be said to be principally increase
of land Revenue due to the opera

Taluka.	More.	Less.	Net increase or decrease.
Kumpta	5386. 12. 0.	461. 9. 6.	Increase 4924. 3. 6.
Sirsy	212. 15. 6.	340. 1. 10.	Decrease 127. 1. 4.
Honawar	59. 4. 6.	1856. 13. 1.	Decrease 1797. 8. 7.
Sidapur	19. 11. 1.	294. 2. 6.	Decrease. 274. 6. 7.
Total.	5677. 12. 8.	2694. 9. 8.	2983. 2. 0. Net increase

tions of the Survey and Sale of occupancy in the Kumpta Taluka.

6. Remissions amounting in all to Rs 6160. 11— as detailed in Appendix III have been granted during the year. They are chiefly on account of the introduction of the new Survey rates into villages

in the Kumpta and Sirsy Talukas
x No Abkari advances have
been made in any of the Talukas
in my charge during the year
under Report.

8. The Abkari Revenue of these
districts is managed on the farming
system and the amount realized
at the public auctions are shewn
below.

Talukas.	Country Spirits		Country Liquor		Ganja & Bhang		Total	
	No. of Shops	Amount	No. of Shops	Amount	No. of Shops	Amount	No. of Shops	Amount
Kumpta	2	100	19	6200	3	705	34	7005
Sirsy	1	30	38	2792	2	778	41	3600
Honawar			8	870			8	870
Sidapur			20	4220	1	165	21	4385
Total	3	130	120	6992	6	1648	129	6972

The auctions of country liquor shops fetched Rs 160 less than they did last year.

-ment of last year reported in my
No 255 of the 6th June 1879 gives a net
increase of Rs 2983. 2. 10. as per mar
-gin. The causes of this are given
in detail in Appendix II and

of land Revenue due to the opera

Talukas	More.	Less.	Net Decrease or Increase
Kumpta	5886. 12. 10.	461. 9. 6.	Increase. 4924. 3. 4.
Sirsy	212. 15. 6.	340. 0. 10.	Decrease 127. 1. 4.
Honawar	59. 4. 6.	1896. 13. 0.	Decrease 1837. 8. 7.
Sidapur	19. 0. 0.	296. 2. 6.	Decrease. 276. 6. 7.
Total,	6177. 12. 8.	2694. 9. 10.	2983. 2. 10. Net increase

tions of the Survey and Sales of occupancies in the Kumpta Talukas

6. Remissions amounting in all to Rs 6160. 11- as detailed in Appendix III have been granted during the year. They are chiefly on account of the introduction of the new Survey rates into villages

in the Kumpta and Sirsy Talukas

7. No Sakari advances have been made in any of the Talukas in my charge during the year under Report.

8. The Abkari Revenue of these districts is managed on the farming system and the amount realized at the public auctions are shewn below.

Talukas.	European Spirits		Country Liquor		Ganja & Bhang		Total	
	Shops.	Amt.	Shops.	Amt.	Shops.	Amt.	Shops.	Amount.
Kumpta	2.	100	29.	16282	3.	705	34.	17087.
Sirsy	1	50	38.	27412	2.	775	41.	28237
Honawar	"	"	23	5700	"	"	23	5700.
Sidapur	"	"	20	14221	1.	165	21	14386.
Total	3.	150.	120.	63796	6	1645	129.	65711.

The auctions of country liquor fetched Rs 160 less than they did last year.

-ment of last year reported in my No 258 of the 8th June 1879 gives a net increase of Rs 2983. 2. 10. as per mar-gin. The causes of this are given in detail in Appendix II and may be said to be principally increase of Land Revenue due to the opera-tions of the Survey and Settlement operations in the Kumpta Sirsy Honawar Sidapur Talukas.

Talukas.	Mot.	Less.	Net Decrease or Increase	
Kumpta	5386. 12. 10.	461. 9. 6.	Increase.	4924. 3. 4.
Sirsy	212. 15. 6.	340. 4. 10.	Decrease	127. 1. 4.
Honawar	59. 4. 6.	1596. 13. 2.	Decrease	1537. 8. 7.
Sidapur	19. 11. 11.	296. 2. 6.	Decrease.	276. 6. 7.
Total,	5677. 12. 8.	2694. 9. 10.	Net increase	2983. 2. 10.

6. Remissions amounting in all to Rs 6160. 11. as detailed in Appendix III have been granted during the year. They are chiefly on account of the introduction of the new Survey rates into villages

in the Kumpta and Sirsy Talukas.

7. No Sakari advances have been made in any of the Talukas in my charge during the year under report.

8. The Abkari revenue of these districts is managed on the farming system and the amount realized at the public auctions are shewn below.

Talukas.	European Spirits	Country Liquor	Ganja	Bhang	Total
	Shops. Amt.	Shops. Amt.	Shops. Amt.	Shops.	Amount.
Kumpta	2. 100	29 1629	3. 705	34.	17055.
Sirsy	1 50	38. 2742	2. 775	41.	22867
Honawar	" "	53 5700.	" "	53	15700.
Sidapur	" "	20. 1422	1. 165.	21.	14986.
Total	3. 150.	120. 6998.	6 1645	129	69711.

The auctions of country liquor shops fetched Rs 160 less than they did last

year

The following table gives the state as on July 1st of the collection of the total government demand (the realizable revenue) ascertained up to that date, including those arising subsequently to the Jamabandy.

Talukas	Demands	Collections	Total Balance made known at the close of the year
Municipal Limits	1/3 of 139463	1/2 of 134957	4506 / 11
	1/2 of 45460		552 " 8 "
Sirur	1/3 of 1243220	1143056	700 / 7 "
	1/2 of 41992	41606	386 " "
Haveri	1/3 of 1393525	1293911	1014 " "
	1/2 of 36376	35376	1000 " "
Sidapur	1/3 of 988925	908853	1428 " 2 "
	1/2 of 16962	16962	00 " "
Total	7114.4.4	6709 3 8	7528 10 8

The result is fairly satisfactory in all Talukas.

Talukas and there appears to be no
reason for supposing that there will
be any considerable outstandings
balance at the end of the year.

10. The season has been a good
one. The Rain
having been
of sufficient
quantity
and well
distri-
buted for
the chief crop of the district namely
the rice crop.

11. The marginal table in
paragraph 2 can not be given in respect
of the talukas in my charge as
not surveyed and none are fully
settled.

The condition of all classes
in this district is certainly
Superior

	Rainfall	
Talukas	Average of 10 years	Current year
Kumpta	In. 139.29.	In. 118. 38
Ankola	74.24	64. 35.
Honawar	134. 15	127. 79
Sidapur	101. 55.	72. 51.

The following table gives the state on July 1st of the collection of the total governmental demands (i.e. Realizable Revenue) ascertained up to that date, including those arising subsequently to the Jamabandy.

Taluka	Demands	Collection	Total Balance including remissions pending Appeal
Kumpta	Kharip 59,462	15 2. 18,495	43,967
	Kharif 43,613	6. 43,160	452
Sirsy	Kharip 1,24,288	10. 1,16,388	7,900
	Kharif 41,992	41,606	386

The result is fairly satisfactory in all

Talukas.

Talukas and there appears to be no reason for supposing that there will be any considerable outstandings or balance at the end of the year.

10. The season has been a good one. The rain in the Talukas mentioned below during the last 3 years and the current year having been of sufficient quantity and season able for the chief crop of the district namely the rice crop.

Talukas	Rainfall Average of last 3 years	Current year	
	Ins.	Ins.	Cents.
Kumpla	129.29	112	38
Karwar	71.54	62. 35.	
Ankawer	134. 15	137. 79	
Sidapur	101. 55.	72. 51.	

11. The marginal table to this paragraph cannot be given as none of the talukas in my charge are not surveyed and none are fully settled.

The condition of all classes in this district is certainly

superior to that of similar classes in any of the Karikan or Deccan districts with which I have any acquaintance. This is undoubtedly largely due to the fact that the population is sparse and does not press with any undue severity on the land. There is not much waste land available in either of the two coast talukas Honawar and Kumpta. In Sirsy especially towards the east on the Mysore & Dharwar frontier there are considerable tracts of land available for cultivation being waste for which there is no demand apparently for the reason that the villagers have already as much land as they can cultivate. In some of the villages in this part

of the district the area of cultivation
is being steadily contracted. The
villages are mostly situated on
the banks of the Nerbudda river
very little of the part of the coun-
try flooded which is just the only
one considerable area of the kind
cultivated near its banks. On inquiries on this point when during
the favourableness of this portion of
the Deep Nerbudda valley
this year and I came to the con-
clusion that the apparent dimi-
nution in the cultivation
is very light on these lands is not
the cause of them not being cultiva-
ted. Agricultural labour is
very scarce and it does not pay
the villagers to cultivate any
but the best lands. The people
of these parts are very well off.

but

superior to that of similar classes in any of the Bardesan or Deccan districts with which I have any acquaintance. This is undoubted by largely due to the fact that the population is sparse and does not press with any undue severity on the land. There is not much waste land available in either of the two Coast talukas Honawar and Kumpta. In Sirsy especially towards the east on the Mysore & Dharwar frontiers there are con-siderable tracts of land available for cultivation being waste for which there is no demand apparently for the reason that the villagers have already as much land as they can cultivate. In some of the villages in this part

of the district the area of cultivation is being steadily contracted. The villages are mostly situated on the banks of the Wardá a river very liable at this part of its course to floods which injure the crops over a considerable area of the land situated near its banks. I made enquiries on this point when during the Jamabandy of this portion of the Sirsy Taluka at Jamkandi this year and I came to the conclusion that the Cyperus which is very light on these lands is not the cause of their not being cultivated. Agricultural labour is very scarce and it does not pay the villagers to cultivate any but the best lands. The people of these parts are very well off

but

inferior to that of similar classes in any of the Konkan or Deccan districts with which I have any acquaintance. This is undoubted ly largely due to the fact that the population is sparse and does not press with any undue severity on the land. There is not much waste land available in either of the two Coast talukas Honawar and Kumpla. In Sirsy especially towards the east on the Mysore & Dharwar frontiers there are con- siderable tracts of land avail able for cultivation being waste for which there is no demand apparently for the reason that the villagers have already as much land as they can cultivate. In some of the villages in this part

of the district the area of cultivation is being steadily contracted. These villages are mostly situated on the banks of the Wardá a river very liable at this part of its course to floods which injure the crops over a considerable area of the land situated near its banks. I made enquiries on this point when doing the Jamábandy of this portion of the Sirsy Taluka at Bundarki this year and I came to the conclusion that the Apersent which is very light on these lands is not the cause of their not being cultivated. Agricultural labour is very scarce and it does not pay the villagers to cultivate any but the best lands. The people of these parts are very well off

and the fever which has been prevalent now for many years had apparently checked that increase in the population which would have been otherwise the natural result of this prosperity The construction of a road such as has been under consideration along the Dharwar frontier from Bamanali to Badamgode or Malgi would doubtless by facilitating the means of communicating with Surat and the coast tend to bring at all events a portion of this waste land under cultivation but until the population increases and consequently agricultural labour becomes more abundant there is little chance of any very considerable

portion.

portion of this land being cultivated. Although much has been done since the establishment of Local Funds to improve the internal communications of this district still there remains much to be done to open out satisfactorily the rich Supari & Spice gardens of Sidapur & Sirsy. Some of the grassed salt marsh lands in the Coondapoor talooka has been taken up during the year under report on special conditions and it appears probable that all of this description of land which it would be advisable to give out will eventually be brought under cultivation as there is a considerable demand for land that can be turned into rice land

but the fever which has been prevalent now for many years had apparently checked that increase in the population which would have been otherwise the natural result of this prosperity The construction of a road, such as has been under consideration along the Dharwar frontier from Banavasi to Badamgode or Haly would doubtless by facilitating the means of communicating with Sirsy and the coast tend to bring at all events a portion of this waste land under cultivation but until the population increases and consequently agricultural labour becomes more abundant, there is little chance of any very considerable

portion ..

portion of this land being cul-
-tivated. Although much has been
done since the establishment of
Local Funds to improve the inte-
-nal communications of this dis-
-trict still there remains much
to be done to open out satisfac-
-torily the rich Supari & Spice gardens
of Sidapur & Sirsy. Some of the
exposed salt marsh lands in
the Coompta taluka has been
taken up during the year under
report on special conditions and
it appears probable that all of
this description of land which
it would be advisable to give
out will eventually be brought
under cultivation as there is a
considerable demand for land
that can be turned into rice lands

but the fever which has been prevalent now for many years had apparently checked that increase in the population which would have been otherwise the natural result of this prosperity The construction of a road, such as has been under consideration along the Dharwar frontier from Bamnaalli to Badamgode or Maly would doubtless by facilitating the means of communicating with Sirsy and the coast tend to bring at all events a portion of this waste land under cultivation but until the population increases and consequently agricultural labour becomes more abundant, there is little chance of any very considerable

portion

portion of this land being cultivated. 163 The Examination of the Salnka Accounts were effected in general accordance with the directions at pages 95 to 98 of the manual at Salnka 1st Examination 2nd Examination the periods dates dates stated vis Kumpta 30th October 1879 to 3rd May 1880 the margin. Sirsy 17th to 28th February 1880 to 18th to 22nd May 1880 Owing to my Honawar 16th to 18th March 1880 detentions Sidapur 24th January to 6th February at head-quarters for nearly two months mentioned above, I was unable to make the 2nd Examination of the Accounts in the Honawar and Sidapur Salnkas. The comparison of Nuzur Form No III with Salnka Form No II was made monthly in accordance with the orders of Government and a further Examination of the day-book & other

Expansion

Explanations were made at the time of carrying the taluka accounts.

14. The amount of village inspection which I have performed personally is shown below. Owing to my detention at Head quarters I was unable to do as much inspection as I would have wished in the Nowsaree Taluka. In Nowsaree there is only one village settled the boundary marks of which I examined last year and in Sidepore there are no villages settled. I have, therefore, examined no boundary marks in these two talukas this year. The work of the village officers is not very satisfactory in any of my talukas and is decidedly bad in Kumpel

A.F.

It has been found necessary to fine 38 Shanbogs (Village Accountants) and 20 patels, to suspend four patels, to dismiss one patel, and to reprimand one Shanbog. A new distribution of Shanbogs' and patels' charges in the Kumpta Taluk is under consideration, which, I trust will have the effect of rendering those officers more efficient than they are at present.

Talukas	Villages				Hyderabad Land			
	Total number	Number of Shanbogs	Number of Patels	Number of Karnams	Total number	Number of Shanbogs	Number of Patels	Number of Karnams
Kumpta	201	32	34	35	26	214	9	71
Siray	162	22	21	21	20	115	19	15
Honawar	136	4	8	8	4	101		
Sidapur	95	9	11	11	17	55		
Total	700	68	123	125	67	524	28	196

explanations were made at the time of examining the taluka accounts.

14. The amount of village inspection which I have performed personally is shewn below. Owing to my detention at head quarters I was unable to do as much inspection as I would have wished in the Honawer Taluka. In Honawer there is only one village settled the boundary marks of which I examined last year and in Sidapur there are no villages settled. I have, therefore, examined no boundary marks in these two talukas this year. The work of the village officers is not very satisfactory in any of my talukas and is decidedly bad in Kumpta.

24. The number of Meetings held by each Committee and the extent of their inspections of works are shewn below. I have inspected all the more important works in progress in my charge.

Taluka	No of members	Nos held	Meetings Average attendance	No of times he and Committee inspected	Inspections No held	No of Average kms inspected each time	No of times inspected each work
Kumpta	4.	3.	2.	2.	23.	29.	2.
Sirsy	4.	2.	3½.	2.	1.	19.	2.
Honawar	4.	1.	3.	1.	6a.	18.	3.
Sidapur	3.	1.	1.	1.	1.	10.	2.
Total	15.	7.	9½.	6.	91.	69.	9.

25. The planting of roadside trees has been carefully attended to with the results specified below. Nurseries have been formed at the Taluka headquarters & branches of the banian tree have also been

planted and wherever a suitable
place could be found. Stephens
has taken to plant a row
of the road between Honawar and
Kumpta by excavating holes of
some size in the rock and filling
up with soil. The experiment has
so far been successful. Most of the
roads in my charge which are
not shaded by the jungles have
been planted with trees, the exceptions
being those portions of roads
which pass over laterite rock and
some few roads passing over dams
that have been quite recently
constructed. The planting of
these roads must be a matter
of time as the work will be
very expensive and the Local
Funds have many other more

emergent

24 The number of Meetings held by each Committee and the extent of their inspections of works are shewn below. I have inspected all the more important works in progress in my charge.

25. The planting of roadside trees has been carefully attended to with the results specified below. Nurseries have been formed at the Taluka headquarters & branches of the banian tree have also been

planted

planted out wherever a suitable place could be found. Steps have been taken to plant a rocky portion of the road between Honawar and Kumpta by excavating holes of some size in the rock and filling up with soil. The experiment has so far been a success. Most of the roads in my charge which are not shaded by the jungles have been planted with trees, the exceptions being those portions of roads which pass over laterite rock and some few roads lying over sand that have been quite recently constructed. The planting of these roads must be a matter of time as the work will be very expensive and the Local Funds have many other more

urgent

Avenged Roads upon them. There are no roads in my charge unprotected with trees for any considerable length of their course.

27. The general progress of works under Civil Agency throughout my charge during the year has been

Satisfactory

unsatisfactory. Under Public Works Agency the roads in the Sidapur Taluka which are so much wanted have as yet not got beyond the Survey stage and the repairs to bridges on the Kundpla and Kalkund ghaut road had not when Mamlatdar took it in March been taken in hand Little interesting petty repairs on Local Fund roads by Public Works Department are also done in this Collectorate. Such repairs are as a rule of an extremely simple nature and are constantly recurring Culverts of brushwood covered with moorum having done the work as long as could have been expected of it collapses and the road is rendered thereby unfit for wheeled traffic. The Public Works Department have

[illegible] staff to be constantly [illegible] the numerous [illegible] of the [illegible] on our roads. And when the taluka or village Authorities [illegible] broken [illegible] it takes naturally some little time to get the Public Works Department to repair the work, whereas were the Mamlatdar in charge of the road, or order to the patil of the village would not matter straight in the hour.

VI Municipalities.

28. There are three Municipalities in my charge and their income & expenditure during the year 1879-80 are shown below. The most important improvement which was undertaken during the year was the bridge over the arm of the creek on the sea-beach

beach road at Kumpta. ——
was commenced in December 1879
and was completed by the end of
May 1880 and cost a little over Rupees
The work was most useful one
-ing the sea beach with the town. No
work of magnitude has been carried
out during the year by the Gokarn
Municipality but many useful re
-pair works such as clearing out
some old wells and making
Cart road connecting the town with
the Dispensary have been complete
The Gokarn Municipality exists
principally for the purpose of keeping
the town clean during the great
yearly festival held there. This
purpose it adequately performs
and expends some money in re
pairing roads and a bridge

have on the staff to be continually
watching the numerous culverts of
their description on our roads and
when the talukdar or village Authori-
ties discover a broken culvert it
takes naturally some little time to
get the Public Works Department
to repair the work, whereas were the
Mamlatdar in charge of the road,
an order to the patel of the village
would set matters straight in 24
hours.

VI Municipalities.

28. There are three Municipalities
in my charge and their income and
expenditure during the year 1879-80
are shewn below. The most import-
ant improvement which was under
taken during the year was the bridge
over the arm of the creek on the sea-
beach.

beach road at Kumpta. This work was commenced in December 1879 and was completed by the end of May 1880 and cost a little over Rs200. The work is a most useful one connecting the sea beach with the town. No work of magnitude has been carried out during the year by the Sirsy Municipality but many useful small works such as clearing out some old wells and making a cart road connecting the bazaar with the Dispensary have been completed. The Gokarn Municipality exists principally for the purpose of keeping the town clean during the great yearly festival held there. This purpose it adequately performs and expends some money in repairing roads and a bridge

Expenditure

E/12

VII Public Health.

9. The extent of general conservancy in the principal towns may be inferred from the expenditure shewn in the last paragraph. The particulars of the expenditure is given below. That at Kumpla is the most successful owing to the efficiency and deserved popularity of Assistant Surgeon McKenzie in charge of it

Stations	Towns	Conservancy	Establishment	Conservancy 1879-80. Establishment	Total
Kumpla	Kumpla	202. 1127.	326.	1.5.2.	7402. = 5934. D.
Monroe	Monroe	42. 3816.	000	743 9.7.	= 1243. 9.7.
Seiry	Seiry	48. 5228.	000	957. 5.10.	= 1957. 5.10
Sidapun	Sidapun	50	2603.	550.	561 3.5. = 1111. 3. 5.
	Total.	442.	12814.	5	10446.7.11

10. As far as I am able to judge

from

from the duplicate weekly returns which I receive from the vaccinators, vaccination progresses fairly through my charge and I have had no complaint to make against any of the vaccinators during the year under report. The total number of children vaccinated during the year by Local Lymph vaccinators is 6408 and 437 Children were vaccinated by Officers in charge of Dispensaries. There has been no small-pox during the year.

V. The population and resources of my charge according to the census Annual Census taken in July 1879 in Village form No 13. and given in below. The mortuary returns have been tested in as many villages as possible and appear to be fairly kept. There are no places unpro-

vided

VII Public Health.

29. The extent of general conservancy in the principal towns may be inferred from the Expenditure shown in the last paragraph. The particulars of Dispensaries is given below. That at Kumpta is the most successful owing to the efficiency and deserved popularity of Assistant Surgeon McKenzie in charge of it.

Talukas	Towns	In what	Population	Cost in 1879-80. Government	Local & municipal contribution	Total
Kumpta	Kumpta	202.	11271.	326.	4.8.	257. 12. 2 = 588. 4. 10
Honore	Honore	42.	3816.	500.	—	743. 9. 7. = 1243. 9. 7.
Sirsy	Sirsy	148.	5228.	1000.	—	957. 8. 10. = 1957. 8. 10
Sidapur	Sidapur	50	2503.	550.	—	561. 3. 8. = 1111. 3. 8.
	Total.	442.	22818.	5376.	4. 8.	4505. 2. 3. = 10146. 7. 11

30. As far as I am able to judge

from

from the duplicate weekly returns which I receive from the vaccinators, vaccination progresses fairly through my charge and I have had no complaint to make against any of the vaccinators during the year under report. The total number of children vaccinated during the year by Local Fund vaccinators is 6408 and 637 children were vaccinated by Officers in charge of Dispensaries. There has been no small-pox during the year

4. The population and resources of my charge according to the Annual Census taken in July 1879 in village form No 13 are given as below. The mortuary returns have been tested in as many villages as possible and appear to be fairly kept. There are no places unpro-

vided

VII Public Health.

29. The extent of general conservancy in the principal towns may be inferred from the Expenditure shewn in the last paragraph. The particulars of disbursements is given below. That at Kumpla is the most successful owing to the Efficiency and deserved popularity of Assistant Surgeon McKenzie in charge of it.

I have only been able to visit 31 of these schools during the year In the year under report five new schools have been opened viz one in the Kumpta Taluka, three

in the Sirsy Taluka and one in the Sidapur Taluka. The attendance in most of the schools is fair New school houses have been built at Bad & Upinpatan in the Kumpta Taluka and one in the Bhatcal Peta at Bhatcal. The school house of the principal Vernacular School in the town of Kumpta is inconveniently small for the number of boys attending There is great difficulty in adding to the present building as apparently the foundations and walls are too weak to support an upper story and any extension of the building by adding rooms on the ground floor would make the inner rooms so dark as to render the building useless as a school. I am afraid a

Separate.

separate building will have to be provided for some of the classes. An attempt was made during the year to establish night schools but without success. There are girls' schools at Kumpla and Sirsy both of which are well attended and in most of the ordinary Vernacular schools a few girls attend.

I have the honor to be
Sir.
Your most obedient
servant

A. Cowell.
First Assistant Collector
and Magistrate Mr Clay

in the Sirsy Talúka and one in the Sidapur Talúka. The attendance in most of the schools is fair. Five school houses have been built at Bádshepinpatan in the Kumpta Talúka and one in the Bhatcal Peta at Bhatcal.
